

Actions Intended by Survey Respondents as a Result of the Webinar

Perspective	Intended Action
Agency or institution	Continue to try and promote the use of slashwalls
Agency or institution	Try to convince landowners to use exclosures on oaks to prevent browsing.
Agency or institution	We are already managing deer
Agency or institution	Promote the use of slash walls to both our Agency's Public AND Private Lands Programstaffs
Educator	education for MFO forest walks
Forester	Monitor my slashwall area for invasive plants
Forester	not much
Forester	?
Forester	Strongly advocate for slash walls as a management option
Forester	Include slash wall
Forester	Go look at one of these in person
Forester	none
Forester	May promote the application and see if any landowners request the practice.
Forester	NA
Forester	Look for opportunities to use the same techniques
Forester	Considering the economics of slash walls in deer challenge areas
Forester	Consider slash walls
Forester	gain a better understanding of the long term effects of soil compaction.
Forester	Unfortunately I would not be able to site slash walls on my tree farm . Lot of softwood , wetlands ,and 6 different streams

Perspective	Intended Action
Forester	Try to encourage our great corps of consulting foresters to consider implementing slash walls when a shelterwood or seed tree cut is being done.
Forester	consider slash walls
Forester	None at this time
Forester	Consider future scenarios where slash walls may be feasible
Forester	prescribe / discuss were appurtenant with clients
Forester	I will pass this info to some clients that may wish to consider the practice.
Forester	We have plans to build several slashwalls in the near future.
Forester	Look into local slashwalls usage.
Forester	Examine our forest to determine if it has sites where slash walls would be feasible and, if so, apply for NRCS funding to build them.
Forester	Keep informed of the ongoing results (studies) of slash walls. Particularly, the Return On Investment, including pre site prep, species composition, post management practices. post
Forester	plan to implement one
Forester	continue with TSI
Forester	Continue to explore the utility of slash walls
Forester	consider slash walls when in high browse areas
Forester	Focus more attention to existing regen before an operation.
Logger / Forest practitioner	Talk with landowners about slash walls
Logger / Forest practitioner	plan my own slash wall
Logger / Forest practitioner	none
Maple/Agroforestry Producer	I began building concept slash walls after reading the Forest Connect article "Slash Walls: Concepts and Applications for the Control of Deer Impacts to Forest Vegetation". I will continue this practice when sufficient slash is available.

Perspective	Intended Action
Natural resources specialist	Attend the next related webinar to learn more
Natural resources specialist	Increase use of slash walls in forest management
Natural resources specialist	Evaluate the feasibility of employing a slash wall if a small enough geographic area with specific resource concerns that could be alleviated by reducing deer impacts is identified.
Natural resources specialist	talking with forest engineer for management of forest at high moose browsing impact
Natural resources specialist	pass link to watch onto a more advanced/"important" colleague
Other (please indicate)	Having come to the realization that I do not have sufficient slash, investigate a brush wall for a portion of my 27 acre brush lot primarily filled with wild fruit trees.
Other (please indicate)	i will be installing my third and fourth slash walls on private land -- these for my farm. the slash walls will total 10,000' long and enclose 70 acres
Other (please indicate)	In discussion
Other (please indicate)	In discussion
Woodland owner	fence and cover species to protect from Deer browsing
Woodland owner	Investigate undertaking a 20 acre slash walls
Woodland owner	discuss with forester
Woodland owner	explore the cost of implementing
Woodland owner	continue to study slash walls
Woodland owner	learn more
Woodland owner	get help to create an area bounded by slash
Woodland owner	Survey regeneration in my slash wall and evaluate other stands for potential slash wall.
Woodland owner	share the general findings with other woodland owners
Woodland owner	N/A

Perspective	Intended Action
Woodland owner	Observe the regeneration and hope the hunters keep deer population down.
Woodland owner	Explore the possibility of implementing.
Woodland owner	I plan to pursue studying the feasibility of creating a small 10 ac. slash wall project on our woodlot.
Woodland owner	May share the concept on future forest walk throughs with woodlot owners
Woodland owner	I will set up two test patches to see if excluding deer decreases the amount of bittersweet.
Woodland owner	build an exclosure in my woodlot
Woodland owner	nothing specific at this time
Woodland owner	Trying to attend the Arnot Forest Visit on Sept 25, 2025.
Woodland owner	Keep learning about how these systems can be used.
Woodland owner	Continue maintaining my 1 acre slash wall
Woodland owner	No change at this point.
